PROFILE

Software professional with 2+ years of experience implementing and supporting client-facing web and mobile applications. Experienced in understanding client requirements, translating business needs into technical solutions, configuring workflows, integrating third-party services, troubleshooting issues, testing features, and supporting production delivery. Strong technical background with hands-on experience across APIs, databases, backend workflows, frontend and mobile applications. Comfortable working directly with clients and technical teams to understand requirements, resolve implementation issues, and deliver working solutions.

CORE COMPETENCIES

Requirements Analysis	Client Communication
Solution Implementation	Technical Troubleshooting
API Integration	Third-party Integrations
Workflow Configuration	Business Logic Implementation
System Testing	UAT and Issue Resolution
Production Support	Root Cause Analysis
Technical Documentation	Cross-functional Collaboration
Database and Data Workflows	Software Development Lifecycle

EDUCATION

Bachelor of Science in Computer Science, FAST NUCES, Lahore 2020 – 2024

WORK EXPERIENCE

Software Developer, Chakor 2024 – Present

- Worked directly with clients to understand business requirements and translate them into practical technical solutions.
- Implemented and maintained client-facing web and mobile applications across multiple projects and business domains.
- Configured application workflows, business logic, databases, user roles, and system functionality based on project requirements.
- Integrated third-party APIs and services, including payment platforms, AI services, communication tools, and external data providers.
- Analyzed API requirements, authentication methods, data structures, dependencies, and integration limitations during implementation.
- Troubleshoot technical and functional issues by investigating workflows, API responses, database behavior, and application logic to identify root causes.
- Worked with clients and internal technical teams to clarify requirements, resolve implementation issues, and communicate progress and technical constraints.
- Tested implemented features against requirements, identified functional issues, and performed fixes before production delivery.
- Supported production applications by investigating reported issues and implementing changes based on client feedback and business requirements.
- Managed multiple implementation requirements while working within agreed project timelines and adapting to changing client needs.
- Documented workflows, technical requirements, integrations, and implementation details to support development and ongoing maintenance.

Software Engineer Intern, Qwerty Experts 2023

- Developed and supported mobile application features using React Native based on functional and technical requirements.
- Implemented backend functionality using Node.js and MongoDB and worked with REST APIs for application communication.
- Investigated application issues, identified technical causes, and implemented fixes to improve application functionality.
- Collaborated with team leads and developers during feature implementation, testing, debugging, and application delivery.

PROJECT EXPERIENCE

Health Wallet (Live)

- Implemented a digital health wallet platform supporting employees, organizations, administrators, and healthcare providers.
- Configured automated quarterly allocations, scheduled workflows, and annual account resets based on business requirements.
- Implemented backend business logic and data workflows to support accurate financial processing.
- Investigated workflow and functional issues and implemented solutions based on expected business behavior.

Athlete – Fitness Application (Website)

- Contributed to implementation and delivery of a cross-platform fitness application using Flutter.
- Integrated Strava, Garmin, and Apple HealthKit APIs to retrieve and process fitness and health data.
- Implemented features for fitness metrics including VO2 max, endurance, and functional strength tracking.
- Supported application testing, troubleshooting, and release activities for both Apple App Store and Google Play Store.

AnchorShareLock (Live)

- Implemented a role-based locker rental platform supporting Admin, Customer, and Franchisee workflows.
- Configured workflows and business logic across multiple user roles and platform processes.
- Implemented Stripe subscription billing, payment workflows, revenue sharing, and platform service fees.
- Troubleshoot interconnected workflows and resolved functional issues across payment and platform processes.

Shaping Homes (GitHub)

- Developed a cross-platform mobile application involving frontend, backend, APIs, and AI-powered functionality.
- Implemented REST APIs and worked across frontend and backend components to connect application workflows.
- Investigated integration requirements, technical dependencies, and application behavior during implementation.

SKILLS AND TECHNOLOGIES

Implementation	Requirements Analysis, Solution Implementation, Workflow Configuration, System Integration, Testing, Troubleshooting, Production Support
APIs and Integrations	REST APIs, API Integration, Stripe, OpenAI, Gemini, Xero, Plooto, Strava, Garmin, Apple HealthKit
Development	JavaScript, Node.js, React Native, Flutter, Bubble.io, FlutterFlow, HTML, CSS
Backend and Data	Database Concepts, MongoDB, Data Workflows, Backend Logic, Workflow Architecture
Tools	Postman, GitHub, Figma, VS Code, Android Studio
Professional	Client Communication, Requirements Gathering, Technical Communication, Cross-functional Collaboration, Problem Solving
