Professional Summary

Mobile Developer with 2+ years of software development experience building and maintaining web and mobile applications. Hands-on experience developing cross-platform mobile applications using Flutter and React Native, integrating REST APIs and third-party services, implementing backend workflows, and troubleshooting application issues. Experienced with Flutter mobile development, API integration, authentication, business logic, data handling, testing, and application deployment. Strong experience working directly with clients to understand requirements, implement features, resolve issues, and deliver production-ready applications.

Technical Skills

Mobile Development	Flutter, Dart, React Native, Cross-platform Mobile Development, Mobile UI Development
Programming Languages	Dart, JavaScript, Python, C++
Frontend Development	Flutter, React Native, React.js, HTML, CSS, JavaScript
Backend Development	Node.js, Express.js, MongoDB, REST APIs, Backend Workflows
APIs and Integrations	REST APIs, Stripe, OpenAI API, Gemini, Strava API, Garmin API, Apple HealthKit, Xero, Plooto
Mobile and Health APIs	Strava, Garmin, Apple HealthKit, Fitness Data Integration, Health Data Integration
Development Tools	Git, GitHub, Postman, Firebase, VS Code, Android Studio, Xcode
Other Technologies	Bubble.io, FlutterFlow, Database Design, API Integration, Third-party Services

Professional Experience

Software Developer, Chakor 2024 – Present

- Developed and maintained production web and mobile applications based on client requirements and business workflows.
- Developed cross-platform mobile application features using Flutter, including user interfaces, application logic, API integrations, and third-party service integrations.
- Implemented and maintained REST API integrations to connect mobile applications with backend services and external platforms.
- Integrated fitness and health platforms including Strava, Garmin, and Apple HealthKit to retrieve and process user fitness and health data.
- Implemented application features involving authentication, business logic, data handling, workflows, and third-party services.
- Worked directly with clients to understand requirements, clarify functionality, provide technical updates, and incorporate feedback into application features.
- Troubleshot application issues by investigating API responses, workflows, backend logic, database behavior, and frontend functionality.
- Tested implemented features, identified bugs, and performed fixes to ensure application functionality matched project requirements.
- Integrated third-party services including Stripe, Gemini, OpenAI, Xero, and Plooto.
- Collaborated with clients and internal team members throughout the software development lifecycle, from requirements and implementation through testing and production delivery.
- Supported mobile application release and maintenance activities for applications deployed to the Apple App Store and Google Play Store.

Software Engineer Intern, Qwerty Experts 2023

- Developed mobile application features using React Native based on functional and technical requirements.
- Implemented backend functionality using Node.js and MongoDB to support mobile application features.
- Developed and consumed APIs for communication between mobile applications and backend services.
- Debugged application issues, implemented fixes, and tested features before delivery.
- Worked with team leads and developers to implement application updates and incorporate user and client feedback.

Mobile Projects

Kale – Longevity Insurance Application (Website) (App Store) (Google Play)

- Developed a cross-platform mobile application using React Native with Firebase as the backend.
- Integrated Garmin, Strava to retrieve and process user fitness and health data.

- Implemented application workflows for longevity scoring, quarterly reassessment, insurance premium calculations, and family coverage.
- Built functionality for health data processing, user interactions, data management, and insurance-related workflows.
- Implemented and integrated backend functionality using Firebase for data storage, authentication, and application workflows.
- Tested and maintained mobile application features and supported deployment to the Apple App Store and Google Play Store.

Athlete – Cross-Platform Fitness Application (Website) (App Store) (Google Play)

- Contributed to the development of a cross-platform fitness application using Flutter and Dart.
- Integrated Strava, Garmin, and Apple HealthKit APIs to retrieve and process fitness and health data.
- Implemented features for VO2 max, endurance, and functional strength tracking.
- Worked on API integration, application workflows, data handling, and mobile application functionality.
- Tested and maintained application features and supported deployment to the Apple App Store and Google Play Store.

Shaping Homes – React Native Mobile Application (GitHub)

- Developed a cross-platform mobile application using React Native.
- Built backend services using Node.js and Express.js to support mobile application functionality.
- Designed and consumed REST APIs for communication between the mobile application and backend services.
- Implemented AI-powered functionality and integrated application workflows across frontend and backend components.

Education

Bachelor of Science in Computer Science, FAST NUCES, Lahore

2020 – 2024
